

Name of the inventory	<i>Career Development Self-Efficacy Inventory</i>	
Purpose/Content:	To assess student's self-reported confidence in applying various career development life skills competencies.	
Developers/ citation	Life Skills Development Project, Faculty of Education, The University of Hong Kong	
Year	2004	
Targeted user	Student	
Description	No. of questions	24
	Scale	6 point Likert scale Extremely Not Confident= "1" Not Confident= " 2" Hardly Confident= "3" Fairly Confident= "4" Confident="5" Extremely Confident="6"
	Data collection format	Self-report
	Result interpretation	Career development contains 6 categories. For each category, write the scores of the items beside the item numbers. Sum up the scores within each category then divide the total score by 4 to find out the mean score of each category. After that to sum up the individual category mean scores and then divide by 6 to show the total mean score of career development. The lowest score is 1 and the highest score is 6.
